SUMMARY

Gameplay Programmer with Unity and C# experience across multiplayer networking, physics-based movement, gameplay systems, and data-driven content pipelines. Professional experience contributing to gameplay, animation, and franchise systems for a commercial football title, with personal project experience developing a host-authoritative networked platformer focused on movement, interaction, and gameplay feel.

EDUCATION

Bachelor of Science in Computer Science — *University of North Carolina at Charlotte*

May 2026

Concentration in Artificial Intelligence, Robotics, Gaming — *Game Design and Development Certificate*

SKILLS

Languages: C#, C++, C, Python, Java, JavaScript

Game Engines & Tools: Unity, Unreal, Photon Fusion, Git, Blender, Aseprite

Gameplay Programming: Multiplayer Networking, Physics-Based Gameplay, Player Movement, Gameplay Systems

Pipelines & Data: JSON, Data-Driven Content, Tooling, External API Integration

PROJECTS

Axis Football '27 — Gameplay & Franchise Systems (Unity/C#, JSON, Data-Driven Systems)

- Built a data-driven franchise news system that generates dynamic in-game articles from league simulation data
- Created a scalable JSON template pipeline using 80+ article templates and 400+ contextual tags for teams, players, standings, awards, records, and season events
- Designed the system to support expandable article types without hardcoding individual stories

Shroomfall — Multiplayer Physics-Based Platformer (Unity, C#, Fusion)

- Developing a multiplayer physics-based platformer centered on active-ragdoll movement and object interaction
- Implementing host-authoritative networking systems to synchronize locomotion, interaction, and gameplay across clients
- Iterating on movement feel, debugging tools, and gameplay systems through frequent playtesting

EXPERIENCE

Axis Games, Game Developer, Charlotte, NC

Oct 2025 - Present

- Contribute to gameplay and presentation features for *Axis Football '27* within a multidisciplinary team pipeline
- Implemented and refined tackle animation behavior by tuning positional offsets, rotations, timing, and edge-case scenarios including goal-line, sideline, high-speed, and side-impact tackles
- Tested, debugged, and validated gameplay changes to improve reliability, presentation quality, and in-game responsiveness

Queen City Scooters, Cloud Engineering Intern, Charlotte, NC

Oct 2025 - Jan 2026

- Designed and implemented a cloud-based product price crawler using AWS services and the Shopify API to monitor and aggregate pricing data
- Integrated external APIs and automated data retrieval pipelines to track product updates across multiple storefronts

CCI Instructional Assistant, UNCC, Charlotte, NC

Aug 2024 - May 2026

- Support students with programming assignments in Java and help debug code during lab sessions
- Assisted over 80 students per semester, strengthening peer communication and teaching skills

CCI Makerspace Lab Assistant, UNCC, Charlotte, NC

Apr 2024 - May 2026

- Operate and maintain 3D printers, laser cutters, and fabrication tools in a student-access makerspace
- Assist students with technical projects and troubleshoot hardware and software issues
